

PP Sow Penning

Deba Brothers® is a leading China PP Sow Penning manufacturers, suppliers and exporter. The sow and pig fatten crates are manufactured by adopting the overall hot dip galvanizing technology. They are internally and externally anti-corrosion. Connection points are not welded, crates can be produced in batches and assembled on the spot.

Product Description

Find a huge selection of PP Sow Penning from China at Deba Brothers®. Deba Brothers® provides professional production technology in the production of pp sow penning. When the piglets grow to a certain size, they will be feed in the finisher, the PP sow penning is one of them. The pigs can act out their need for movement in the PP sow penning. The sows' great freedom of movement boosts the metabolism and therefore increases feed intake, keeping the sows in a good condition.
